Student UI & Account Creation

The student interface uses five primary areas:

Login (Refer to the [demo video](#) for the creation processes.)

- Account creation using Name, email, password and T&C.
- Email-password login, password recovery, Google sign-in, and account creation.
- Provides a separate entry point for administrator login.

Home

- Shows course-completion percentage, current module, and a Resume Learning action.
- Displays saved programs and quick access to ongoing learning.

Browse

- Search and filter internships or learning programs by category, mode, and type.
- Save opportunities, open program details, and apply from the detail page.

Tasks

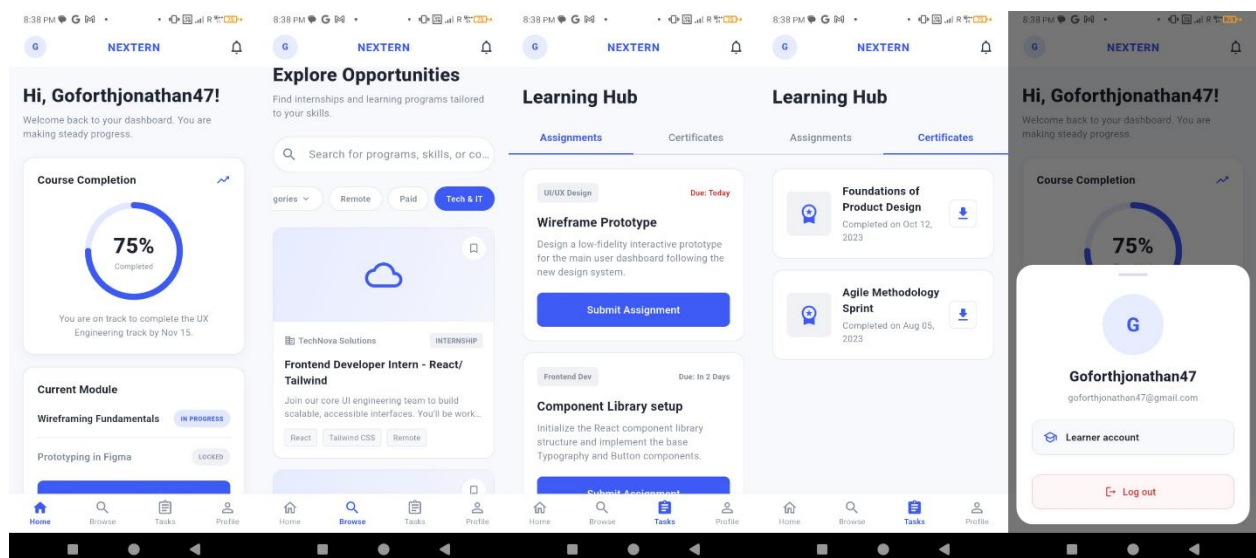

- View assignments with due, submitted, and under-review status.
- Open the Certificates section and download completed-program certificates.

Profile

- Access student account and profile information.
- Logout is available inside the Profile tab.

Student Journey

Login → Explore opportunities → Save or apply → Complete assignments
Track progress → Download certificates

Admin UI

Dashboard

- Displays active-user count, average program completion, and system overview metrics.
- Provides quick actions for announcements, users, and programs.
- Lists recent assignment submissions for review.

Users

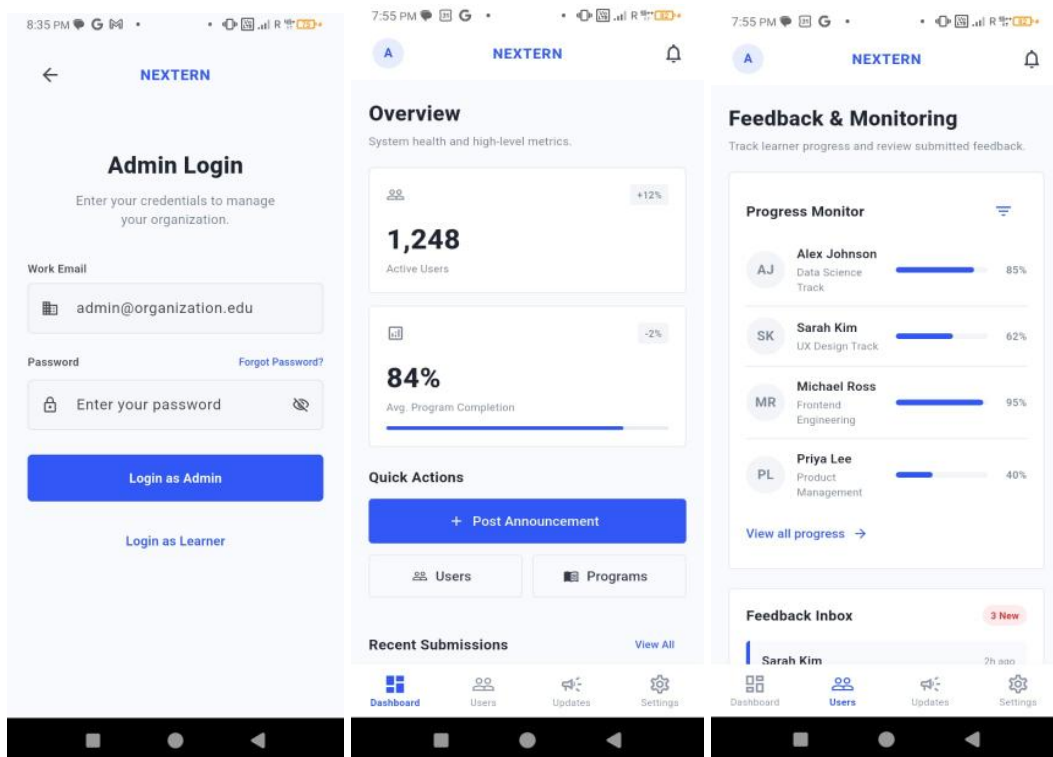

- Monitors learner progress across learning tracks.
- Provides a feedback inbox for learner comments and support issues.

Updates

- Used by administrators to create and manage announcements for students.

Settings

- Functions are not finalized; the tab is reserved for future administrative configuration.
