

App Proposal Document

NEXTERN

A Mobile Platform for Learning, Internships, and Career Development

Prepared by

TEAM 18

Mobile App Development with Flutter Internship

Excelerate

July 2026

Introduction

Nextern is a mobile app that helps learners and administrators manage learning, internships, and educational activities in one place. It makes it easier to access programs, track progress, and stay connected.

Purpose of the App

The purpose of **Nextern** is to provide a simple platform where learners can access programs and internships, while administrators can manage users, content, and communication more efficiently.

Problem Statement

Learners often find it difficult to access programs, assignments, and updates in one place, while administrators need a better way to manage users, announcements, and learning activities. **Nextern** solves these challenges by providing a centralized platform for both groups.

Target Users

Learners

- Access learning programs and internships.
- Submit assignments and track progress.
- Receive announcements and notifications.

Administrators

- Manage users and learning programs.
- Post announcements and monitor submissions.
- Track learner progress and provide support.

Key Features

Browse learning programs and internships.

Save favorite programs.

View and submit assignments.

Track learning progress.

Receive announcements and notifications.

Download certificates.

Submit feedback (Learners) and review feedback (Administrators).

Manage users and programs (Administrators).

User Journey

Learner Journey

- Open the app and log in.
- Browse and save preferred programs.
- Apply for a program or complete assignments.
- Track progress and receive updates.
- Download certificates and submit feedback.

Administrator Journey

- Log in to the admin dashboard.
- Manage users and learning programs.
- Post announcements and review assignments.
- Monitor learner progress.
- Review feedback and update program information.

Conclusion

Nextern is designed to provide learners and administrators with a simple and organized mobile platform for managing learning activities, communication, and career opportunities. The proposed features aim to improve accessibility and create a better user experience.
